

## **Modernization Consulting Associate**

Metex is the world's leading provider of client server modernization solutions. For 20 years Metex has been developing, supporting and modernizing mission critical applications for Governments, Fortune 500 corporations and software companies around the world. Metex offers unique and innovative solutions for Java and .NET platforms, a challenging environment and the opportunity to join an enthusiastic team.

This position is primarily an application analysis, training, consulting and client development role that may be based in our head office in Toronto or potentially a home office. The role involves a significant amount of travel to visit clients and attend industry events, meetings and training sessions at our corporate offices and other locations throughout North America and Europe. In addition to performing the primary analysis and consulting tasks, this position will work extensively with sales and marketing teams and requires strong client relationship skills.

### **Responsibilities**

- Work with clients to analyze client server environments and develop effective modernization strategies and project plans.
- Maintain knowledge of industry, market trends and sector activity.
- Participate in ongoing development, product management and planning efforts.
- Achieve and maintain a high level of knowledge and expertise in current Java and .NET technologies.
- Work closely with internal support and project management teams to ensure a high level of client satisfaction and project success.
- Participate in industry events and associations, and attend seminars, classes and training to gain further knowledge in modernization best practices.
- Take on special assignments as requested by senior management.

### **Required Skills**

- 4-year University degree or equivalent education and/or experience.
- 10+ years of consulting and systems development background with significant experience in large systems.
- Strong presentation and client relationship skills.
- Excellent oral and written communication skills.
- Demonstrated confidence and comfort in front of an audience.
- Ability to be positive and proactive under a wide range of client situations.
- Must be a team player who creates a positive working environment and strives to be a leader.
- Able to use prior experience to assess client's existing practices and processes, analyze requirements and develop effective recommendations for successful modernization solutions.
- Ability to comfortably communicate and work with IT personnel on client server application, database, systems and related technical issues.

If you are eager to join an industry leading company and possess the skills listed above, please email your resume and salary expectations to [jobs@metex.com](mailto:jobs@metex.com).

Metex would like to thank all applicants for their interest but will only contact a short list of potential candidates.
